

The New MBC-1000 Battery Tester

FASTER, MORE ACCURATE AND
MORE DECISIVE THAN EVER BEFORE.

The new MBC-1000 quickly diagnoses battery health. It identifies possible charging and starting system issues in a way that is easily understood by the technician and customer.

BENEFITS OF THE MBC-1000

A full battery and system test only takes **90 seconds** instead of up to **5 minutes**.

Charge and retest rate down from ~16% to **~8%**.

Bluetooth enabled means you run the test from your device making it easier and more efficient to use.

Exclusive software, specifically designed for Australian needs.

Automatic upload of test data using WIFI, mobile network.

App based with free updates and enhancements.

Performance reporting by site and user.

Lightweight, durable and easy to use. No more long cables. **No more AA batteries.** The MBC-1000 charges itself from the car battery under test.

Email, sms or print out results with Bluetooth enabled printer.

Most cost effective tester ever offered by Club Assist.
